

Today's Best Thyroid Treatments Explained by Dr. Kent Holtorf

By: J. D. Heyes, Natural News

Kent Holtorf, M.D., is scheduled to speak at The Thyroid Summit, an online event which begins June 2 and runs through June 9. His presentation will be titled "Don't Fall Through the Cracks: Safely and Effectively Treat Your Thyroid Condition."

According to his website, Holtorf is head of the Holtorf Medical Group, which was "founded on the belief that every patient deserves to have the highest quality of care, compassion, and understanding when striving for a better quality of life."

"We practice this belief every day as we treat thousands of patients who suffer with chronic conditions, have been treated by multiple doctors and some that have even lost hope," says the group.

"There is a solution!"

"We've dedicated our practice to providing you the best in evidenced-based, highly integrative medicine that's not only safe and effective, but provides measurable results. Our physicians are trained to provide you with cutting-edge testing and innovative treatments to find the answers you deserve and a treatment plan that is personalized to your specific condition," the group says.

"We'll guide you every step of the way, monitoring your results to not only improve your symptoms, but optimize your health and improve your quality of life."

Among the conditions and afflictions the group treats:

Thyroid disorders, age management, hypertension, low libido, cancer prevention, bone-building density, Lyme disease, PMS, menopause, adrenal fatigue, migraines, type 2 diabetes and other ailments.

"You deserve the best care from a team of specialized health care providers who understand, are compassionate, and who have personally walked this journey to wellness," the group says. "Isn't it time you do the same?"

These are the subjects Holtorf will cover:

Why mainstream medicine misses the mark in detecting thyroid illness.

TSH testing is not the gold standard thyroid test.

The advantages of Compounded T3 medication over others.

Why Synthroid and Levothyroid fail so frequently.

Lose weight by understanding one simple blood test.

More than half of the population is suffering from thyroid problems, according to the event website. The summit will feature some 30 presentations about common medical problems tied to thyroid disease. In them, you'll learn why the thyroid gland is the master gland in your body -- every cell depends on thyroid hormone to function optimally.

If you're not aware of a thyroid problem, you could develop psychological, cardiovascular and neurological disorders. Medications for a variety of symptoms will never solve the problem, but optimizing your thyroid hormone with vitamins, minerals, dietary changes and the right medications can.

This summit will provide you with all the information you need to optimize thyroid function and stop the suffering once and for all:

Learn why conventional medicine misses the diagnosis.

Find out which thyroid tests will properly evaluate thyroid function.

Educate yourself and learn how to speak with your medical professionals.

Access safe and effective natural remedies from over 30 world-leading authorities.
